

1. recon_report

Target IP: 192.168.31.199

Domain Info:

- Local test environment (Metasploitable2)
- DVWA application detected

Subdomains:

- Not applicable (local lab environment)

Exposed Services:

- HTTP (Apache)
- Tomcat (8180)
- SSH

2. Asset_mapping

Timestamp	Tool	Finding
-----	-----	-----

2026-04-24 10:00:00	Shodan	Apache service detected
2026-04-24 10:15:00	Maltego	Domain mapped to IP

3. Checklist

- ✓ Check WHOIS
- ✓ Enumerate subdomains
- ✓ Identify tech stack
- ✓ Map IP address
- ✓ Identify services

summary

Performed reconnaissance on the target system to gather information about exposed services and infrastructure. Using tools like Shodan and Maltego, identified the Apache web server and mapped domain to IP. No subdomains found due to local setup. Findings helped prepare for further vulnerability assessment and exploitation phases.
